The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1)⊠	Responsive to communication(s) filed on 07 February 2005.							
,								
3)	,— · · · · · · · · · · · · · · · · · · ·

### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the disclosure that "the grooves are adapted and constructed to reduce transverse strains generated by bending such that the member is capable of bending to conform to a curved surface while maintaining electrical connections between adjacent ridges."

In response to the applicants arguments, page 6, lines 4-9 of the applicants' disclosure does not mention electrical connections at all. The phrase "electrical connection" implies a physical, conductive component between two nodes or electrodes. No such description is inferred in these lines.

### Allowable Subject Matter

Claims 22-25 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to show a piezoelectric bimorph bender with cut out portions which go entirely through the bimorph.

Application/Control Number: 10/041,919 Page 3

Art Unit: 2834

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Additional prior art cited reads on some aspects of the claimed invention. For example Fritsch ('206) notes a bimorph with holes in it which extend lengthwise at col. 5, II. 53-72, however he doesn't show such an embodiment such that his configuration is well understood. Do-huu ('512) a circular piezoelectric element with concentric grooves. Maushard et al. ('700) show a piezoelectric device with holes through it, but he doesn't show a bimorph.

Direct inquiry to Examiner Dougherty at (571) 272-2022.
